- Node.js
- UX/UI
- Tailwind
- Spring Boot
- Adobe illustrator
- MySQL
- Posgresql

LANGUAGES

- Khmer (Native)
- English (Intermediate)

PROFILE

I am a developer who blend design and engineering to create seamless digital products. Using Next.js and GraphQL, I deliver robust, type-safe applications with a focus on user interface and experience (UI/UX), ensuring even complex features are accessible through a minimalist design.

WORK EXPERIENCE

Nano Sound Co. Ltd JAN 2026 - APR 2026
Junior Developer

- Provide rapid-response support for urgent, high-priority projects, ensuring sales workflows remain uninterrupted during peak demands.
- Integrated frontend applications with backend APIs using GraphQL
- Translate sales team feedback into actionable system updates or workflow refinements.
- Assisted with inventory and order-related features.

Bong IT Solutions Sep 2025 - Dec 2025
Freelance Front-End Developer

- Tested changes and debugged issues step by step to understand system behavior.
- Built and maintained reusable UI components using Shadcn/UI
- Fixed minor UI bugs and improved cross-browser compatibility

WORK EXPERIENCE

Ey kor ban - Wheel Spinner

It's a decision-making web that solves the classic "where should we eat?" problem, but with a high-end, modern aesthetic.

- Engineered a highly interactive landing page using Next.js and Framer Motion,
- Managed state persistence using Local Storage, allowing for dynamic user-generated content
- Implemented a Neo-brutalist UI with Tailwind CSS, focusing on high-contrast aesthetics
